Product Details

General Construction Details

- Designed for the outdoors, AIS Outdoor Collection uses premium materials to ensure that your products are built to last.
- Durable construction, UV and scratch resistant powder-coated steel and marine-grade hardware are all included to ensure AIS Outdoor will endure weather and high traffic use.
- All products are designed for water run-off, wind passage and are weighted for outdoor use.
- The customer/installer is responsible for supplying tethering solutions based on field conditions.

Powder-Coated Steel

- AIS Outdoor Collection uses marine-grade powder-coated steel for all metal components.
- Designed for the outdoors, our products feature a premium two-step coating process, starting with a zinc-phosphate pre-coat that provides unmatched corrosion resistance and durability. Topped with a high-performance polyester powder coat, this advanced finish delivers superior UV protection, enhanced rust resistance, and a long-lasting, vibrant appearance that stands up to the toughest outdoor conditions.
- Powder-Coating specs include:
  - Pencil Hardness (ASTM D3363) 2H+
  - Impact (ASTM D2794) up to 160 inch lbs.
  - Flexibility (ASTM D522) 1/8 inch - No fracturing
  - Humidity (ASTM D2247) 1,000+ hours
  - Salt Spray (ASTM B117) 1,000+ hours

HDPE (High-Density Polyethylene)

- Used in Seaboard Series and Delago Tables, AIS's High-Density Polyethylene (HDPE) is a thermoplastic polymer using special polymers and additives to ensure toughness, rigidity and longevity.
- HDPE will not rust, delaminate or rot when exposed to UV, humidity or water making it an ideal material for outdoor use.
- AIS's HDPE uses the finest color pigments along with a UV stabilizer that protects the material from degradation and help maintain the color. Color pigments and UV stabilizers are FDA approved (heavy metal free).
- HDPE will not rot, delaminate and does not require paint, stain or other ongoing maintenance.

The Cascades Series combines an approachable design with lasting durability. Featuring sturdy tubular metal construction, curved back for ergonomic support, and slotted surfaces for ventilation and water drainage. Marine grade powder coated finish ensures Cascades is built to withstand the elements for year-round use. The Cascades Series includes seating, stools, and dining tables (counter and bar heights included), benches and occasional tables with consistent design elements that make it ideal for outdoor and indoor use.

FEATURES AND BENEFITS

- Cascades Series includes seating, stools, and dining tables (counter and bar heights included), benches and occasional tables.
- Approachable design with gentle curved metal frames.
- Slotted cut-outs for ventilation and water drainage are consistent throughout the series.
- Marine grade powder coated finishes for UV and scratch resistance.
- Crafted with weather resistant materials to resist corrosion for year-round use in all climates.
- Durable construction to endure weather and high traffic use.
- Weighted for outdoor use.

The Mesa stacking chair features an all-metal, slim-profile frame and is designed for space-efficient stacking up to 8 high. The slightly slanted seat ensures water runoff while the back doubles as a handle for easy stacking and movement. Ideal for outdoor pavilions, indoor cafes and training rooms, the Mesa chair is built for year-round use.

FEATURES AND BENEFITS

- Stacks efficiently to 8 chairs high.
- Marine grade powder coated finishes for UV and scratch resistance.
- Crafted with weather resistant materials to resist corrosion for year-round use in all climates.
- Durable construction to endure weather and high traffic use.
- Ideal for outdoor and indoor spaces.
- Weighted for outdoor use.
- Marine grade stainless steel wire base includes high impact clear plastic glide for outdoor use.
- Glide options include: Outdoor - high impact clear plastic. Or Indoor - high impact clear plastic with non-marring felt pad.
