PROJECT NEEDS

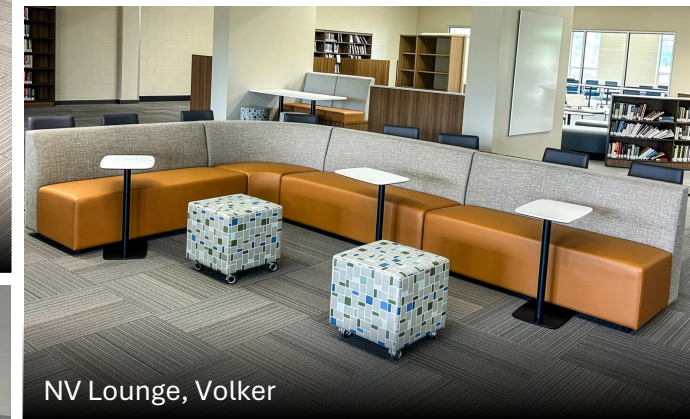

This library space had not been updated in over 20 years and needed a comprehensive revitalization to better serve today's students. The project called for a variety of flexible, comfortable environments to support diverse student needs, including relaxation areas, testing centers, tutor touchdown spaces, heads-down focus areas, private offices, classrooms, and a mother's room. The client also wanted to incorporate bold pops of color throughout the space to bring energy and personality into the library and create a more inviting atmosphere for students.
