Reshape™

by Daniele Gollinucci

Circular Design Principles
Featuring a high percentage of recycled content

Lumbar Adjustment
Height-adjustable lumbar, engineered with an open-structure design that promotes airflow and breathability

Quick Attach System
A patented, tool-less assembly system for the back and armrests

Synchronized Mechanism
Weight-responsive mechanism follows the natural movement of the body and adjusts the chair to each user

Casters
Open hub design, double wheel casters

Back & Seat Materials
Effortless removal and replacement of seat and back materials

Arms
3D adjustable armrests (height, depth, pivot)

Tension Boost
Patented Boost adjustment allows user to effortlessly adjust from low to high tension

Personalized Fine-Tuning
Front-accessible adjustment knob allows users to fine-tune the recline tension to their exact comfort level

Reshape is designed for how work, and products, should evolve over time. It's a chair built to adapt, renew, and extend its life alongside the people who use it.

As workplaces shift and needs change, Reshape responds with a more flexible, responsible approach to seating, one that prioritizes comfort, longevity, and a lighter impact on the environment.

Reshape™

by Daniele Gollinucci

Reshape is a modular ergonomic task chair designed to adapt, evolve, and perform over time. Featuring a weight-responsive recline system, adjustable lumbar support, and patented, tool-less assembly, it delivers personalized comfort, simplified maintenance, and long-term value for a variety of workplace environments.
