

University IT Department

Case Study

AIS

Industry:	Education	Number of stations:	307
Location:	Baltimore, MD	Project Date:	August 2018

Company Overview & Project Needs

This large university decided to consolidate their IT departments from multiple locations into one new building. The project goals were an extension of their organizational pillars to further professionalism, accountability, transparency, and efficiency.

The client was looking for a furniture partner to provide semi-private workstations, private offices, huddle rooms, conference rooms, break-rooms, and training rooms.

The Results

The University choose AIS to fulfill all their furniture needs because of the AIS competitive edge of low cost, value, and performance.

AIS incorporated height adjustable tables into Divi workstations for heightened ergonomics with screens that moved with the tables for added privacy. These same Day-to-Day tables can be found in the private offices. Day-to-Day fixed height tables were found in many informal conference rooms, while Calibrate Conferencing with power was the table chosen for the formal conference room. AIS reached into the break areas with Day-to-Day standing height tables coupled with Pierce Stools.

AIS Solutions

- Divi Panel System
- Day-to-Day Height Adjustable, Conference, and Café Tables
- Calibrate Series Conferencing
- Bolton Seating
- Devens Seating
- Natick Seating
- L Series Storage
- Pierce Stools
